

Measured DSL Access Prices

Digital Subscriber Line (DSL) technology provides voice and high-speed data telecommunications over a single analog telephone line. The DSL technology being deployed in some of Infinity's service area is called DSL (digital subscriber line technology) which is able to adapt to differing line conditions and distances and adjust transmission speeds to maximize the efficiency of the data transmission under varying changes in line quality. The data transmission speeds capable with DSL technologies are up to 9 times faster than a 28.8K modem. This service is for connecting your PC or LAN (or WAN) to the Internet via a single high speed DSL circuit. Please contact us with any questions about Megabit Services from QWEST.

Below is a table of pricing for Internet access that **does not** include QWEST Megabit Services line charges.

Measured DSL Bandwidth / Account		Monthly Charge	Install and Setup	Data Transfer Allowance
640K/272K (personal ONLY)	DSL8	\$18.00	\$10.00	4000MB
640K/272K	DSL10	\$25.00	\$10.00	4000MB
640K/544K	DSL20	\$50.00	\$10.00	4000MB
1/1 Mbps	DSL25	\$75.00	\$10.00	4000MB

Recurring charges are billed quarterly. Other contract terms are available upon request. Please call regarding qualifying DSL routers. Set up assistance is available for an additional charge.

Above Service Includes:

- Assistance with QWEST megabit ordering and tariff issues.
- User is responsible for QWEST Megabit account installation and recurring charges.
- Up to 4 POP3 Mailboxes with up to 2 email aliases per mailbox.
- From 1 static usable IPs for your network.
- Additional data transferred over the 4000MB allowance is charged at \$0.006/MB (which is \$6 per 1000MB). See below.
- Availability of our high-speed cache (proxy) server to accelerate your browsing of the world wide web and FTP.
- Use of our news server. We carry over 22,000 newsgroups and can help you in getting the most out of this resource.
- If your domain name is hosted here, 10 SMTP/POP3 mailboxes. Additional blocks of 10 POP3 mail accounts are available for \$100 per year.
- Use of our VRMA Virtual Remote Mail Administration service if your email is configured to your domain(s).
- 10MB for non-domain web page / ftp space / file storage. If used for web page, allows up to 1GB of data transfer per month.
- UNIX (Sun Solaris) shell account.
- Onsite configuration and assistance with Infinity supplied DSL hardware and routers. While we can not guarantee success in assisting in configuring other routers, we will perform onsite installation on your equipment on a per-hour basis.

Measured DSL Account Options		Monthly Charge	Install and Setup	Measured DSL Option Description:
16 routed IP addresses	IPNET/29	\$10.00	\$10.00	This maximum number of IPs yields 13 usable.
Additional Bandwidth	DSL30	\$6.00	N/C	Per 1000MB of additional data transfer per month.

If you are not certain if QWEST Megabit DSL service is available at your location, give us a call and we will help confirm that facilities are available. This qualification can usually be done the same day requested. Megabit services can take up to 45 days for circuit deployment. Please call us for current installation schedules for your location.

No resale of Internet access is allowed on DSL circuits.
